

World Clean-up Day... **The "Paperless" Initiative**

In a step towards environmental sustainability, Bayan Investment Holding Company is pleased to announce the launch of its initiative to move towards a paperless work environment, coinciding with World Clean-up Day. This initiative reaffirms our ongoing commitment to promoting green practices within our organization and adopting more sustainable practices, as short-term and long-term goals have been set to ensure the success of this initiative.

The "Paperless" initiative aims to stop using paper internally by gradually transitioning to digital documentation and communication. This is intended to help reduce waste and positively impact our carbon footprint, as this step aligns with our core values of innovation, sustainability, and social responsibility.
